STEM and their Relevance for VET in Germany

Birgit Thomann
Head of Department

Federal Institute for Vocational Education and Training (BIBB)

VPET Connex 2017
Hong Kong, 17th June, 2017
Content

- Introduction
- Background: The German VET System
- STEM in German VET
- Image and Reality: the need to promote STEM
- Perspective: Skill shortage and dynamics by Industry 4.0?
- Conclusion
Key characteristics of the German Dual System of VET

- Work-based learning in companies and learning at vocational school
- Cooperation between government, private sector and social partners
- Institutionalised research and advisory
- Qualified VET staff (technical and pedagogical skills)
- Acceptance of national training and quality standards
Profile of qualifications in STEM occupations

- Academics: 16% (1,222,000)
- Non-academics (master craftsmen, technician etc.): 23% (1,705,000)
- Skilled workers: 61% (4,564,000)

Source:
Employees in STEM occupations in Germany

- 6,445,000 employees
- 690,000 in IT and Computer
- 356,000 in Maths and Science
- 6,445,000 in Engineering

Career opportunities

Salary of vocational further training graduates in comparison to bachelor graduates (techn./sci.)
Percentage of companies (in per cent) (only companies with 50 or more employees)

Internships: crucial for taking up a STEM career

Gender segregation in VET in Germany

Note: The 238 points mark the position of the different VET occupations. Occupations with the code numbers 100-499 belong to the commercial-technical sector; those with the code numbers 500-999 are service sector occupations.

Female occupations = occupations with 80% or more female trainees; Male occupations = occupations with 20% or less female trainees
